```

```
[123]: 1373487.6831
```

```
[124]: np.var(sales_data['Total Revenue'])
```

```
[124]: 2110366986501.2168
```

```
[125]: np.std(sales_data['Total Revenue'])
```

```
[125]: 1452710.2211044077
```

```
[126]: np.median(sales_data['Total Revenue'])
```

```
[126]: 752314.36
```

```
[127]: np.percentile(sales_data['Total Revenue'],50,axis=0,overwrite_input=True)
```

```
[127]: 752314.36
```

```
[128]: sales_data['Total Revenue'].describe()
```

```
[128]: count      1.000000e+02  
      mean      1.373488e+06  
      std       1.460029e+06  
      min       4.870260e+03  
      25%       2.687212e+05  
      50%       7.523144e+05  
      75%       2.212045e+06  
      max       5.997055e+06  
      Name: Total Revenue, dtype: float64
```

1 Maximum and minimum revenue generated by the product are 5997054.98 and 4870.26.

Revenue has very high variability in it's distribution. The median revenue generated is 752314.36

```
[129]: mp.scatter(sales_data['Total Profit'],sales_data['Total Revenue'])
```

```
[129]: <matplotlib.collections.PathCollection at 0x78950c08d390>
```

The scatter plot also suggests that total profit and total revenue are directly proportional to each other.

```
[130]: mp.hist(sales_data['Total Revenue'])
```

```

[100 rows x 14 columns]

```
[182]: sales_data.plot.bar(x='Unit Price',y='Total_Cost',legend=None,figsize=(15,10),rot=0)
mp.ylabel('Total Cost')
mp.xticks(rotation=90)
mp.locator_params(nbins=90)
```

2.0.4 The above bar plot suggests that higher the value of unit price of a product, more will be the total cost of it.

```
[183]: np.cov(sales_data['Unit Price'],sales_data['Total Cost'])
```

```
[183]: array([[5.55037038e+04, 2.01205393e+08],
           [2.01205393e+08, 1.17492213e+12]])
```

```
[184]: np.corrcoef(sales_data['Unit Price'],sales_data['Total Cost'])
```

```
[184]: array([[1.          , 0.78790543],
           [0.78790543, 1.          ]])
```

The high value of degree of correlation between ‘Unit Price’ and ‘Total Cost’ variables indicates that they are almost directly proportional to each other and highly dependent on each other

```
[185]: sales_data.head()
```

```
